PROFILE

I take interim assignments as Engineering Manager, program and project manager, and technology leader, through Papa Bravo AB. I have held the same kind of role before, as CIO, CTO and IT Director, and I still sit with the teams that deliver.

I am Engineering Manager for two development teams at Avanza Bank. Before that I led program and transformation work at Euroclear Sweden, and product and project work for service and support at Getinge. I have been interim Group CTO at the listed Eniro Group, a member of the management team, with strategy presented to the board. I have been IT Director for Unilabs in Sweden, Norway, Denmark, Finland and the UK, responsible for the regional IT budget, and CIO at MedHelp, reporting to the CEO.

The brief is usually the same. The business and the engineers need one plan: a clear goal, an organisation that works across countries and suppliers, and something that actually gets delivered. It started with Unix operations in the late 1990s, and has since been banking, fintech, medtech and retail technology.

WHAT I BRING

- **Engineering teams.** Two development teams at Avanza. At Klarna, line manager for cloud, databases, Windows and middleware. At Northfork, people in China, Sri Lanka, Ukraine and Sweden.
- **Programs and projects.** Program and transformation manager at Euroclear Sweden. At Getinge, service and support moving from point-of-care devices to hardware and software, with pre-studies, new processes, an organisation proposal, training and tools, inside SAFe.
- **A seat in management.** Management team at Eniro, and strategy presented to the board. CIO at MedHelp, reporting to the CEO. IT Director for five countries at Unilabs, with the regional IT budget.
- **The organisation, not only the plan.** One IT organisation for Unilabs Region North, and lower running costs. A new IT organisation at Eniro, with employees, external staff and outsourcing partners. Recruitment and new ways of working at Trustly. Agile methods for business and IT at MedHelp.
- **Suppliers, contracts and sourcing.** Negotiated with contractors and suppliers at MedHelp, and supported the rest of the company in the same discussions. IT sourcing, outsourcing and strategic planning are part of the work at Papa Bravo.

In the work I use agile methods, Scrum, ITIL, AWS, Unix and Linux, and enterprise and solution architecture. I also use ChatGPT, Gemini, Copilot, Cursor and Claude.

PROFESSIONAL EXPERIENCE

Engineering Manager (consultant) · Avanza Bank — Dec 2025 – present · Stockholm

- Engineering Manager for two development teams.

Founder and consultant · Papa Bravo AB (org. no. 559244-7576) — Feb 2020 – present · Stockholm

- Founded the company. I take interim assignments in engineering leadership, programs, projects and product management.
- The work also covers IT and management consulting, IT sourcing and outsourcing, strategic planning, change management and team building.

Program Manager (consultant) · Euroclear Sweden — Aug 2024 – Dec 2025 · Stockholm

- Program and transformation manager.

Product and Project Manager (consultant) · Getinge — Jan 2023 – Jun 2024 · Stockholm

- Led product and project work for Service and Support in Integrated Therapy Solutions, on a global level.
- Adapted service and support as the organisation moved from point-of-care devices to combined hardware and software.
- Ran pre-studies on processes, tools and collaboration, then implemented the processes, proposed an organisation, and produced training material and tools.
- Worked in an organisation that uses SAFe.

CTO · Northfork — Feb 2022 – Oct 2022 · Stockholm

- Prepared the IT department to scale, for a product that offers grocery shopping by recipe to retailers and publishers, through widgets and APIs.
- Put basic processes in place for the business and for IT, and worked with both to try new technologies and products.
- Took part in every step of getting the product into production.
- Led employees in China, Sri Lanka, Ukraine and Sweden. The rest of the business was in Sweden, the UK, France and the USA.

Interim Group CTO (consultant) · Eniro — Aug 2021 – Feb 2022

- Interim Group CTO for the listed Eniro Group, with the business in Sweden, Finland, Denmark and Norway, and customers in both B2B and B2C.
- Member of the management team. Ran two tracks in parallel: the legacy systems and the solutions that were coming next.
- Worked on the long-term and short-term strategy, which was presented to the board.
- Put a new IT organisation in place, with employees and external staff in several countries, and strategic partners for outsourced services.

Head of Platform (interim) · Trustly — Sep 2020 – Aug 2021

- Led Platform: two teams, Infrastructure and Automation, building infrastructure on premises and in the cloud, plus tools and automation for developers and the rest of the organisation.
- Kept day-to-day operations running, and worked to make the teams more effective and happier.
- Recruitment and new ways of working were a large part of the role, in an organisation with a high pace of change and new business.

IT Director, Region North · Unilabs — Aug 2017 – Feb 2020 · Stockholm

- IT Director for Northern Europe (Sweden, Norway, Denmark, Finland and the UK), in a European company of about 12,000 employees across three regions.
- With the team, set the digitalisation roadmap and strategy for each country and for the region, including the move from older processes and technology toward automation, AI and another way of working.
- Formed one IT organisation for the region, improved cooperation between the countries, cut running costs, and was responsible for the regional IT budget.
- Led internal and external engineering teams, coached managers and colleagues, sponsored and coached IT project managers, and was product owner for common IT systems.

CIO · MedHelp AB — Jul 2015 – Aug 2017 · Stockholm

- Led an IT department spread across the Nordic countries. Reported to the CEO and took part in the management team's strategic decisions.
- Led and sponsored a new platform and user experience for the main product. Made the case to the CEO and the owners, and raised the funding from them.
- Introduced agile methods for the business and for IT, so the two sides would work more closely.
- Set and carried out the IT strategy. Negotiated with contractors and suppliers, and supported the rest of the organisation in similar negotiations.

Manager, Middleware and Cloud Services · Klarna — Jun 2014 – Apr 2015 · Stockholm

- Line manager for four teams: Cloud (an internal cloud with a self-service portal, plus how AWS was used and designed), database engineers (Oracle, Postgres and MS SQL), Windows administrators, and middleware (Nagios, Splunk, New Relic).
- Joined Klarna as Head of Infrastructure (consultant), February to June 2014.

EARLIER EXPERIENCE

2008 – 2014	Diversify Consulting Group	Consultant manager, key account manager, account manager, interim line manager and project manager
2013	TUI Nordic	Operations manager and team coach (consultant)
